EMPLOYMENT HISTORY

Software Engineer, CecureIntel Feb 2025 — Present

- Designed and built a multi-tenant civic engagement platform for UK local councils, delivering core democratic features end-to-end, committee management, public meeting scheduling with automated conflict detection, agenda and minutes publishing, member portals with restricted access, and municipal-year filtering across elections, petitions, consultations, and council spending.
- Designed and implemented a Customizer-driven branding system (hero style variants, color tokens, configurable footers/navigation, per-template controls) and a centralized MetaKeys registry, enabling per-council theming and content configuration without code changes across multiple tenant sites.
- Built a unified PDF generation engine for agenda packs, shadow packs, and hard-copy bundles with dynamic council branding, cover pages, clickable navigation, and participation reporting; designed a consultation response moderation system with inline admin review and respondent-type tracking to support public engagement workflows.
- Led the migration of a React codebase to Next.js and implemented SEO best practices across company websites, cutting load time by 20% and increasing organic visibility by 20%, which contributed to a 5% lift in traffic and revenue.
- Contributed to an HR management application on a microservices architecture and a GenAI application for financial management and fraud detection, building frontend interfaces for AI-driven workflows.

Technologies used: Next.js 14, React 19, TypeScript, Tailwind, Stripe, Zoho Forms, Vercel, Playwright, Zod, TanStack Query, React Federation, PHP 8 · WordPress · DDD · TCPDF · JavaScript · Jest · PHPUnit · Psalm · PHPStan · PHPCS · WCAG accessibility · OWASP-aligned secure coding ·

Software Engineer, Healthtracka Sept 2023 — Feb 2025

- Reduced patient confusion calls by 62% by shipping Patient Dashboard V2; a health-areas experience with biomarker scales, scan summaries, overdue-test alerts, dependent profile switching, and an interactive results timeline
- Shipped the lab results PDF engine + "Download My Results" self-serve flow: turned raw lab JSON into branded reports (8,000+ downloads, 40% fewer nurse follow-up calls, #1 requested feature) and moved 82% of users to self-service, freeing lab staff ~18 hrs/week.
- Delivered the Banking on Women's Health conference platform (full-stack) on a tight deadline: registration, QR ticketing, and admin check-in portal; 1,200+ registrations in 48 hrs, 3-second QR check-ins, 72% shorter queues, 40% less admin workload.
- Launched the organization partner portal with bulk-purchase flows, driving a 30% lift in partner sales volume in the first quarter.
- Improved core app reliability and performance, contributing to a 5% increase in user-satisfaction

scores and a 25% reduction in system downtime; also collaborated cross-functionally on the Healthtracka mobile app for test booking and vitals tracking.

Technologies used: JavaScript, TypeScript, React, React Native, Next.js, Tailwind CSS, Chakra UI, Figma, Rest API, HTML5, CSS3, PrimeReact, Prisma, Nest.js, MySQL, AWS, MongoDB, Cypress, Firebase, Unit Testing

AskBisi— Frontend Developer **Jan. 2023 - August 2023**

Projects: AskBisi

- Spearheaded the development of reusable UI components resulting in a 20% reduction in design time for future projects.
- Worked closely with the design team to implement a responsive and mobile-friendly user interface, resulting in an 18% increase in user engagement on mobile devices.

Hotels Nigeria Internship — *Frontend developer* **Oct. 2022 - Dec. 2022**

Coutvel Nigeria Limited, Nigeria— *Administrative officer* **Jan. 2019 - Aug. 2023**
